

Donor & surrogacy costs

Includes sperm, eggs, embryos and surrogacy

INTRODUCING REPROMED

Repromed is one of New Zealand's leading fertility clinics with a difference – we provide highly personalised care for all. Every client is unique and we are passionate about finding the best solution that meets your individual needs.

By choosing your care from the team at Repromed, you can take comfort you'll receive the best possible fertility treatment, with access to the following:

- World-class technology and access to the latest reproductive techniques
- Excellent success rates, meeting the highest national and international standards
- Highly experienced medical team dedicated to your success
- A supportive, personal and caring approach
- Tailored fertility treatment that suits your individual needs
- Convenient appointment times
- Direct telephone access to nurses

All are welcome - we're passionate about offering fertility treatment that honours your individual values. We value ethnic and gender diversity and are proud that Repromed was NZ's first healthcare provider to receive the Rainbow Tick.

Our highly specialised donor and surrogacy team of doctors, nurses, embryologists and counsellors have a wealth of experience in this field. Collectively they are here to provide an exceptional level of care, coordination and support for you through every step of your fertility journey.

THE COST OF YOUR TREATMENT

The cost of your donor or surrogacy treatment will be discussed once your fertility doctor has created your personalised treatment plan. The process usually follows these steps:

- 1 Initial consultation** with a fertility doctor
- 2 Introduction** to the donor coordinator to discuss treatment and the approximate cost
- 3 Investigations** including but not limited to blood tests, semen analysis and imaging
- 4 Treatment** if successful with finding a suitable donor or surrogate, your treatment plan will be explained by the donor coordinator and fertility counselling begins

The Repromed team are here to help you with any queries about your fertility treatment costs.

Donor and surrogacy fertility treatment costs

At Repromed, we offer treatments for all donor and third party reproduction arrangements including egg, sperm and embryo donation and surrogacy. All treatments are personalised to suit each client's individual needs. Please make sure you are referring to the current version of costs (on the Repromed website), prices are reviewed annually but can be subject to change without notice.

This overview outlines the costs for privately funded fertility treatment outlined in the following sections:

- A Sperm donation**
- B Egg donation**
- C Surrogacy**
- D Embryo donation**
- E Donor egg plus donor sperm**
- F Additional services**

Note that all parties involved in donor and surrogacy arrangements are required by New Zealand law to have a minimum of two mandatory implications counselling sessions with an ANZICA affiliated fertility counsellor which is included in the treatment costs.

GOOD TO KNOW

Medication costs vary depending on the type and quantity used to stimulate the ovaries to provide an adequate ovarian response, which can vary greatly between individuals. At Repromed, medication costs are priced separately from treatment costs – please refer to the Medications cost overview on our website. This is because everyone has a unique requirement based on many factors and ensures you don't pay for more than you need.

A. SPERM DONATION

Treatment with donor sperm is either carried out in an Intrauterine Insemination (IUI) cycle or in an In-Vitro Fertilisation (IVF) cycle, with or without sperm microinjection (ICSI). Please refer to the relevant journey planner available on our website for more details on the different cycle types.

There are two types of sperm donor arrangements at Repromed:

Clinic sperm donors - Donate their sperm to a recipient(s) who is not known to them.

These donors are recruited by the clinic, their sperm is frozen and quarantined prior to the recipient starting treatment. The sperm donor fee per cycle includes the technical and administrative work that is associated with this service.

Known sperm donors - Donate their sperm to a friend, relative or acquaintance. These donors are recruited by the recipient(s) and are required to undergo an initial semen test to establish that their sperm is suitable for freezing and donation. Once this has been confirmed, they continue with a medical consultation, genetic screening, as well as counselling both separately and jointly with the recipient(s) to cover social/ethical implications of donation. The fee for known sperm donors also includes sperm freezing and administrative costs. Note the donor preparation fee is charged once (not per cycle) and is due by the date of the donor's medical consultation.

GOOD TO KNOW

It is not legal in NZ to offer financial payment for sperm donation, however clinic sperm donors receive a small reimbursement to help cover expenses.

Clinic sperm donor

Preparation - recipient

1. Medical consultation for recipient	\$310
2. Recipient counselling – two sessions	\$350

Treatment with Donor Insemination (DI)

1. DI, per cycle	\$1,795
2. Clinic donor sperm fee per DI cycle	\$1,460

OR

Treatment with IVF

1. IVF, per cycle	\$8,930
2. Clinic donor sperm preparation fee, per IVF cycle	\$1,460
3. Medication for IVF cycle	Approx. \$3,500 - \$5,500
4. Sperm microinjection (ICSI), if required	\$2,450

Known sperm donor

Preparation - potential donor and recipient

1. Medical consultation for recipient	\$310
2. Advertising cost for donor recruitment, if required (refer to section F)	\$460
3. Semen analysis for sperm donor	\$280
4. Recipient counselling	\$350

Preparation - confirmed donor

Preparation cost includes: \$2,940

1. Sperm donor medical consultation
2. Sperm donor (and partner, where applicable) counselling
3. Sperm donor genetic screening
4. Sperm donor freezing (three samples and the first 12 months storage)
5. Donor coordination and administration

Treatment with Donor Insemination (DI)

DI, per cycle	\$1,795
---------------	---------

OR

Treatment with IVF

1. IVF, per cycle	\$8,930
2. Medication for IVF cycle	Approx. \$3,500 - \$5,500
3. Sperm microinjection (ICSI), if required	\$2,450

Reciprocal IVF

1. IVF, per cycle (partner A)	\$8,165
2. *If using a clinic sperm donor, clinic donor sperm preparation fee, per IVF cycle	\$1,460
3. Medication for IVF cycle (partner A)	Approx. \$3,500 - \$5,500
4. Sperm microinjection (ICSI), if required	\$2,450
5. Preparation for embryo transfer (partner B), includes scan, blood tests and embryo transfer	\$2,095
6. Medication for embryo transfer cycle (partner B)	Approx. \$0 - \$500

Clinic Donor becoming Known Donor

1. Preparation of known sperm donor, including donor's medical consult, counselling, two separate sperm banking appointments, and first 12 months storage	\$1,850
2. Storage of sperm is invoiced on an annual basis	

B. EGG DONATION

Treatment with donor eggs is carried out in an In-Vitro Fertilisation (IVF) procedure, with or without sperm microinjection (ICSI). Please refer to the IVF Journey Planner online for more details.

There are two types of egg donor arrangements at Repromed:

Clinic egg donors - Donate their eggs to a recipient who is not known to them. These donors are recruited and prepared by the clinic. Eggs are donated to the recipient on the day of egg collection and fertilised with the sperm of the recipient's partner, or sperm donor. The clinic egg donor fee includes the technical and administrative work that is associated with preparation of the donor.

Known egg donors - Donate their eggs to a friend, relative or acquaintance. These donors are recruited by the recipient and are required to undergo an AMH blood test to establish that they have an adequate reserve of eggs. Once this has been confirmed, they continue with a medical consultation, genetic screening, counselling both separately and jointly with the recipients to cover social/ethical implications of using donated eggs. Note the donor preparation fee is charged once (not per cycle) and is due by the date of the donor's medical consultation.

At Repromed, we want altruistic motives to be at the heart of all donations. We offer every egg donor reimbursement, whether it be a known or clinic donor undergoing public or private treatment. This reimbursement reflects the expense, time and effort donors experience throughout the treatment cycle and is discussed with the donor at the time of her medical consultation.

Clinic egg donor

Preparation - recipient

1. Medical consultation for recipient	\$310
2. Counselling – two sessions	\$350

Treatment with IVF - donor and recipient

1. IVF for egg donor, per cycle	\$8,930
2. Medication for egg donor's IVF cycle	Approx. \$3,500 - \$5,500
3. Medication for recipients' cycle	Up to \$500
4. Sperm microinjection (ICSI), if required	\$2,450
5. Clinic egg donor fee	\$4,868
6. Clinic egg donor reimbursement fee	\$1,690

Known egg donor

Preparation - recipient

1. Medical consultation for recipient	\$310
2. Advertising cost for donor recruitment, if required (refer to section F)	\$460
3. Anti-Müllerian Hormone (AMH) blood test, for egg donor	Cost TBA by Labtests
4. Recipient counselling	\$350

Preparation - egg donor

Preparation cost includes: \$3,945

1. Egg donor medical consultation
2. Egg donor (and partner, where applicable) counselling
3. Egg donor genetic screening
4. Donor coordination and administration

Treatment with IVF - donor and recipient

1. IVF for donor, per cycle	\$8,930
2. Medication for donor IVF cycle	Approx. \$3,500 - \$5,500
3. Medication for recipient	Up to \$500
4. Sperm microinjection (ICSI), if required	\$2,450
5. Known donor reimbursement fee	\$1,690

We recommend that all donor egg cycles are 'Freeze-only' cycles where all high-quality embryos are frozen and stored for use in a subsequent cycle. This is to give the optimal chance of successfully achieving pregnancy.

C. SURROGACY

Surrogacy may be medically required when a woman is unable to carry a pregnancy and another woman, the surrogate, is needed to carry the pregnancy for her. There are two different types of surrogacy that Repromed can facilitate if the requirements for surrogacy are met:

Traditional surrogacy - The surrogate gets artificially inseminated with the intended father's sperm. The surrogate uses her own eggs to achieve the pregnancy, carries the baby and delivers it for the intended parents to raise.

Gestational surrogacy - The child is not biologically related to the surrogate mother. Instead, the embryo is created via In-Vitro Fertilisation (IVF), using the eggs and sperm of the intended parents or donors, and is then transferred to the surrogate.

All clinic facilitated surrogacy arrangements require an application to ECART (Ethics Committee on Assisted Reproductive Technology) which Repromed can facilitate, plus independent legal advice (not included in the clinic application fee).

Preparation

1. Medical consultation for surrogate	\$310
2. Gestational surrogate preparation including screening	\$1,588
3. Ethics application to ECART which includes:	\$3,250
• Medical consultation for the intended parent/s	
• Counselling as required for all parties involved	
• Report preparation and application collation by the Repromed Surrogacy team	

Treatment

1. IVF, per cycle	\$8,930
2. Medication for IVF cycle	Approx. \$3,500 - \$5,500
3. Sperm microinjection (ICSI), if required	\$2,450

D. EMBRYO DONATION

Embryo donation involves using frozen embryos that already exist and are in storage at Repromed or another fertility clinic. The embryos have been created through IVF/ICSI techniques and are in excess to the needs of the couple who created them. Embryo recipients must meet with the embryo donors prior to embarking on this treatment.

All donor embryo arrangements require an application to ECART (Ethics Committee on Assisted Reproductive Technology) which Repromed can facilitate.

Initial preparation - paid by donors

Medical consultation for embryo donors	\$310
--	-------

Secondary preparation - paid by recipient(s)

1. Medical consultation for recipient(s)	\$310
2. Ethics application to ECART which includes:	\$3,250
<ul style="list-style-type: none"> • Counselling as required for all parties involved • Report preparation, application collation and facilitation by the Repromed Donor team 	

Treatment

1. Frozen embryo transfer, per cycle	\$2,095
2. Medication for embryo transfer	Up to \$500

E. DONOR EGG PLUS DONOR SPERM

All donor egg plus donor sperm arrangements require an application to ECART (Ethics Committee on Assisted Reproductive Technology) which Repromed can facilitate. Donor preparation costs will be incurred prior to advancing to ECART application and submission of application (see cost details for known/clinic donor egg/donor sperm above).

Preparation

1. Medical consultation for recipient	\$310
2. Ethics Application to ECART which includes:	\$3,450
<ul style="list-style-type: none"> • Counselling as required for all parties involved • Report preparation, application facilitation and collation by the Repromed Donor team 	

Treatment

1. IVF, per cycle	\$8,930
2. Medication for IVF cycle	Approx. \$3,500 - \$5,500
3. Sperm microinjection (ICSI), if required	\$2,450

F. ADDITIONAL SERVICES

Advertising for a donor :

If you do not have a sperm, egg or embryo donor, you may wish to advertise for a donor. Our donor coordinator and counsellors can help you with ideas about where to advertise and review potential donors who respond to your advertisement.

\$460

ECART application for an extension of the 10 year limit for frozen egg, sperm or embryo storage or an extension of an existing ECART approval.

\$310 - \$515

NOTES ABOUT COSTS

- Prices are in NZ dollars and include GST.
- Prices may be subject to change without notice. Please make sure you're referring to the current version of costs, prices are reviewed annually. The Repromed website Cost page will always have the current version.
- The chance of pregnancy is dependent on many factors. There is no refund if you do not become pregnant.
- Please note, once medication has left Repromed, we cannot take it back or provide a refund.
- We accept Gem Visa with an option of spreading your fertility treatment costs across 18 months, interest free. Lending criteria applies, find out more on the Cost page of our website or talk to reception.

PAYMENT TIMINGS

- Consultations and counselling sessions are to be paid on the day of appointment
- All treatment cycles are payable in full either by day 10 of your cycle, or the first blood test
